Now If we were to go back in time and change events to our will, many scientists theorize this can rip apart the fabric of space time. Imagine time is a piece of paper. Everytime you go back in time. Time is folding The more ties you fold paper the easier it is to rip. Therefore if you continued to reverse time over and over again eventually it would rip.

Now If we we e and change
events to our r prize this can
rip apart the ine time is a
piece of pape n time. Time
is folding The the easier it
is to rip. There reverse time
over and ov would rip.

This is why you're failing your class Sleepyhead!

Don't be mad at me cuz you're so boring!

Oooh!

HA HA HA

Boring Teach!

A

SNAP!

Chem Teacher New elements beyond Uranium are constantly being created in labs. Some elements seem to have a profound effect on gravity, and by extension, time.

Hey, Me and some friends are going to see a movie later, Wanna come along?

Sure

Oh no! an EARTHQUAKE!

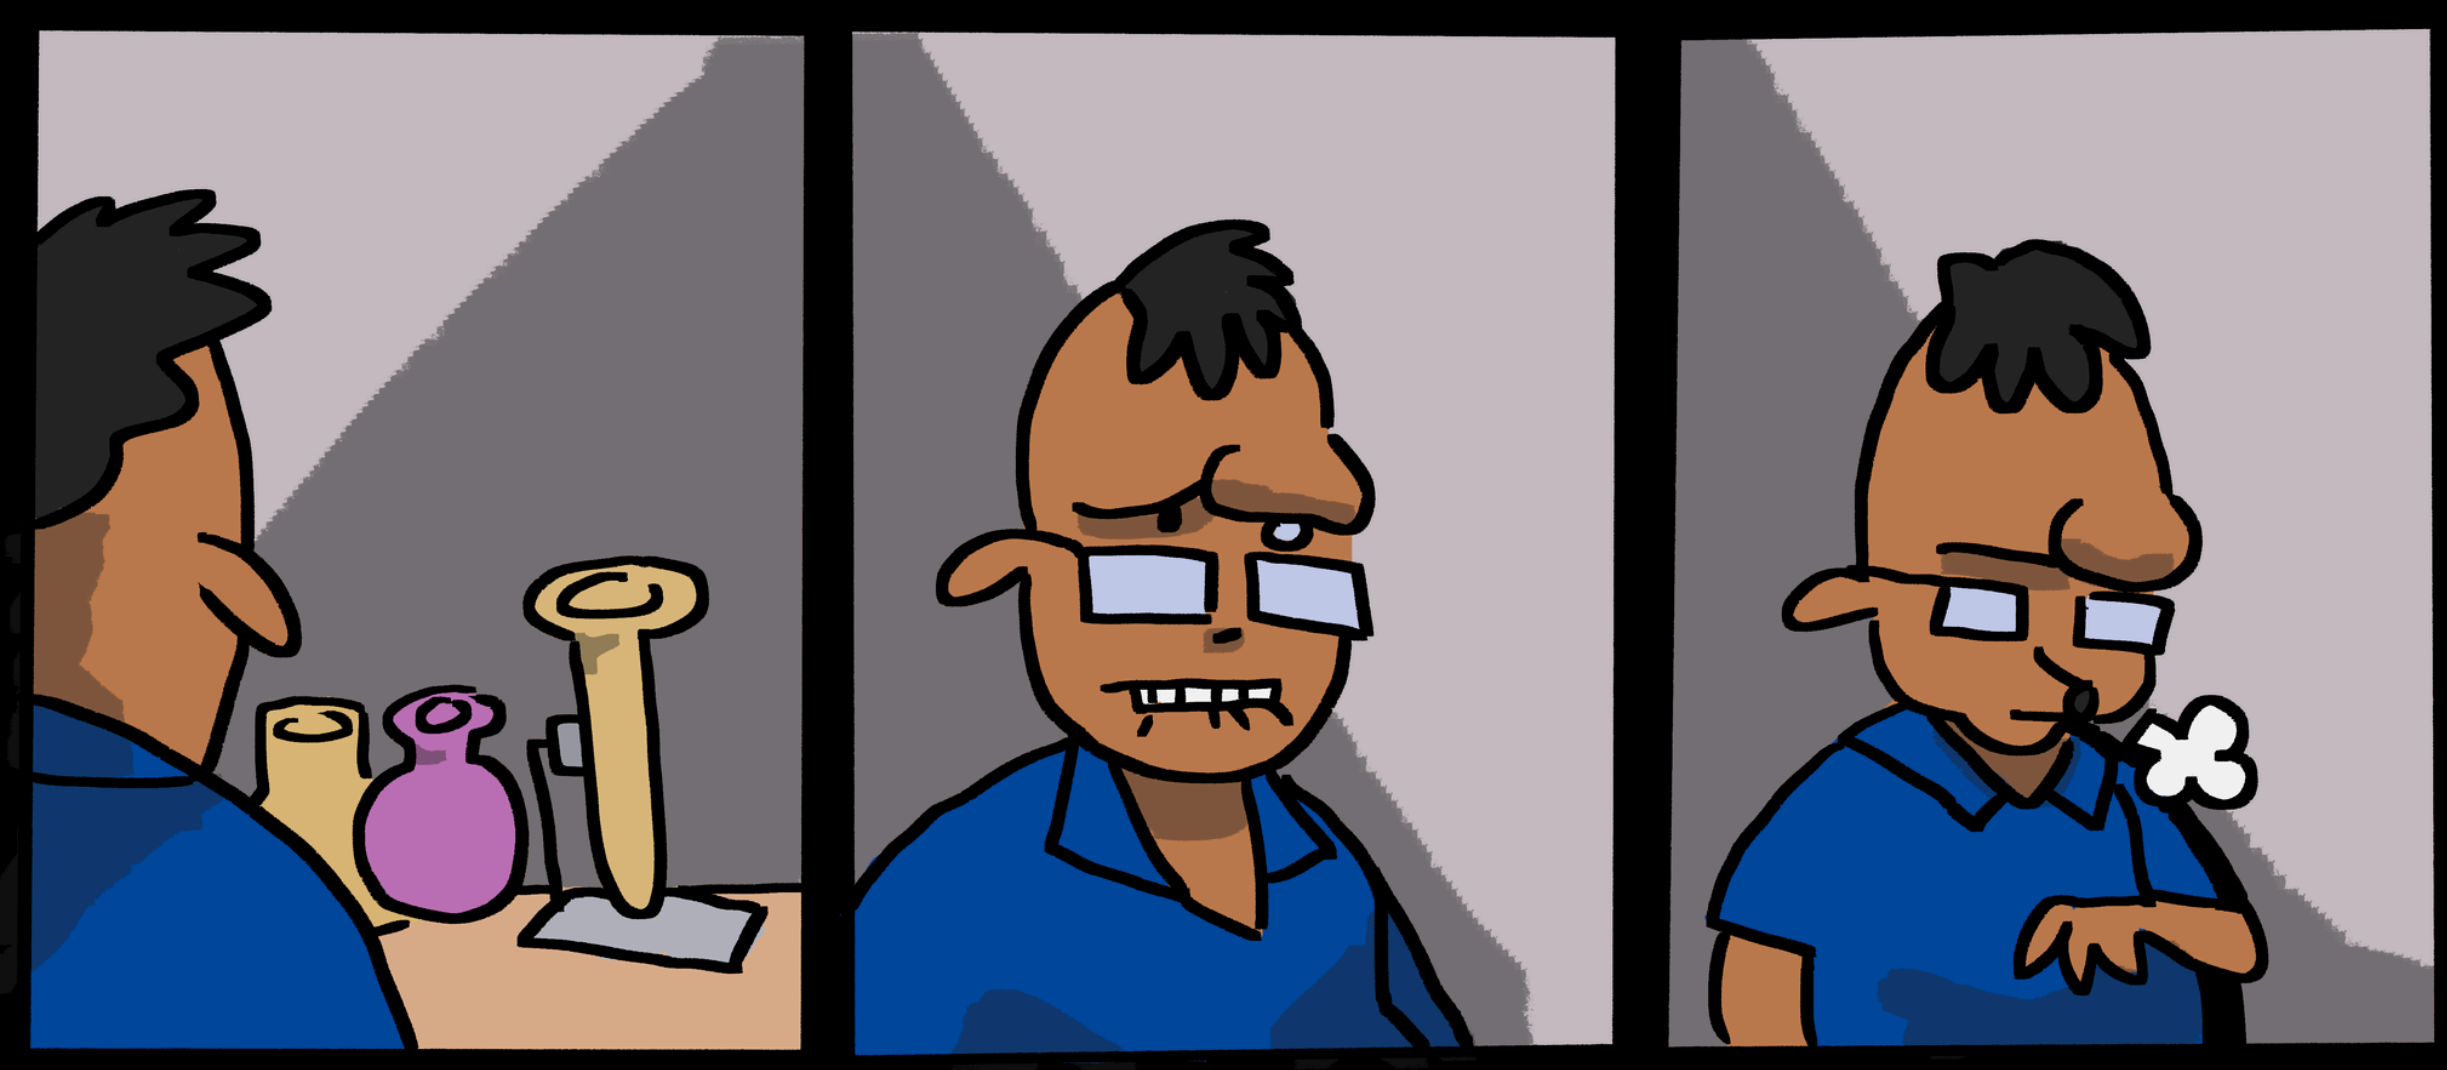
Oh god?! What's happening to me!?

Don't worry it's going to be alright.

Help! I can feel myself, help

Temporal Anamolies

Chemistry?! Elements? Science!?!?



This is why you're failing your class Sleepyhead!
